Card Readers

Go

MagTek's MICR check and card readers bring unprecedented ease, efficiency, and security to the retail counter. With the smallest operational footprints in the industry, these MICRs read the magnetic stripes on credit and debit cards and driver's licenses and the MICR characters on checks, moving customers more quickly through checkout lines. Our readers help reduce the risk of check acceptance at the retail counter; checks are verified instantly; mistakes caused by manual entry are eliminated. Certified by some of the largest retailers in the world, MagTek MICR check readers connect to and communicate with nearly every POS terminal and cash register on the market, transmitting data in the check processor's required format.

Check Readers

Mini MICR w/optional MSR

- Small footprint, low cost check reader with high accuracy and dependability
- Reads and verifies the MICR characters on checks for improved efficiency and reduced fraud
- Optional magnetic stripe reading capability reads any magnetic stripe card or driver's license
- Choose from IBM, OCIA, Wedge or RS-232 interfaces
- Reads E13-B and CMC-7 MICR fonts
